**Endolaser in combination with
Miniphlebectomy in Mexico**

18:20 - 18:30h

Alexander Flor, Frantisek Zernovicky, Zoltán Várady

End, Announcement of next Webinar

The legendary Varady Workshop for Phlebology, Lymphology and Angiology premiered in 1985 in Frankfurt - Germany and has since evolved to host people from 47 different countries on its last occasion. It was initiated by Prof. Zoltan Várady, one of the founders of Minimally Invasive Venous Surgery.

Prof. Alexander Flor would have taken this event to his beautiful Hometown Vienna, the Capital of Austria, for the first time ever, hosting it in a brand new Hotel, in a new district that could be a gateway between History and Modernity.

During the two days of the Congress, many internationally known Specialists were on the Program with their lectures on State of the Art Minimally Invasive Venous Surgery, well-known Companies wanted to exhibit their products and give visitors an overview of diagnosis and therapy options...

then everything turned out differently ..

due to the ongoing COVID19 Situation which makes it impossible for our speakers from Belarus, Chile, Germany, Great Britain, Hungary, India, Italy, Latvia, Mexico, Poland, Russia, Serbia, Slovakia, Ukraine and the USA to travel we decided with a heavy heart to cancel the congress in Vienna.

Instead we are going to pursue a new way and will host our inaugural virtual Conference. Do not miss this unique opportunity, join us via Zoom
